ISTQB Foundation level (CTFL) (3 days)

6 h / day | 5-15 persons | FIN / ENG | FIN / ENG

- The ISTQB Foundation Certificate is an international qualification in software testing coordinated by International Software Quality Testing Board (ISTQB) and organized in Finland by Finnish Software Testing Board (FiSTB). After completing the course you can handle the basic terminology of testing and are aware of techniques and standards. You know different testing tools and are aware of what testing tools can achieve. You know where to find more information about testing and how to establish the basic steps of the testing process. Foundation Certificate is awarded to those who pass a written one-hour multiple-choice exam after the course.

- Target group: IT professionals involved in Software Testing and who would like to gain an internationally accepted qualification in Software Testing.
- Prerequisities: Knowledge of basic concepts related to software testing is useful but not mandatory.
- This course is based on the new ISTQB Certified Tester Foundation Level Syllabus v. 4.0 released in 2023, which combines the topics of the previous Foundation level syllabus and ISTQB Agile Tester syllabus.

Main topics of the course:

- Fundamentals of Testing
- Testing throughout the Software Development Lifecycle
- Static Testing
- Test analysis and design
- Managing the test activities
- Test tools
