

ISTQB Test Automation Strategy (CT-TAS)

(2 days)

6 h / day

5-10 persons

FIN / ENG

ENG

The Certified Tester Test Automation Strategy Specialist qualification is aimed at anyone involved in software testing and test automation. The syllabus presents multiple factors that come into play when planning for test automation within an organization. The Test Automation Strategy syllabus addresses test automation needs beyond those that are technical tool implementation and integration challenges. A strategic view of test automation provides a vision of implementation across projects within an organization in a systematic and consistent manner that ultimately can demonstrate value to the organization.

- **Target group**

- Anyone involved in software testing and test automation. This includes people in roles such as testers, test analysts, test automation engineers, test consultants, test architects, test managers, and software developers. This Specialist qualification is also appropriate for anyone who wants a basic understanding of test automation, such as project managers, quality managers, software development managers, business analysts, IT directors and management consultants.

- **Prerequisites**

- To gain this certification, candidates must hold the Certified Tester Foundation Level v4.0 or previous versions of the Foundation Level certificate and have sufficient practical experience.

Contents:

- Introduction and Objectives for Test Automation Strategy
- Test Automation Resources
- Preparing for Test Automation
- Organizational Deployment and Release Strategies for Test Automation
