

DASA DevOps Fundamentals 3.0 (2 days)

6 h / day

5-10 persons

FIN / ENG

FIN / ENG

The DASA DevOps Fundamentals 3.0 course enables organizations, teams, and individuals to build their capabilities in DevOps. This 2-day course provides a comprehensive introduction to the Agile DevOps principles and approach defined by DASA. DevOps Fundamentals 3.0 encompasses the latest thinking and best practices in DevOps transformation, including current technology trends and successful case studies. It is a capability-building block for organizations looking to transform themselves, preparing them for the DevOps mindset, which encompasses people, processes, and culture.

This course covers the foundational skills and knowledge required for a DevOps transformation journey, starting from the basics of DevOps, origin, and evolution to the current best practices in management, processes, and technology.

The course aligns the vocabulary and concepts of DevOps across all employees and emphasizes the cultural aspects, recognizing that technology is just one part of the transformation journey.

- **Target group**

- individuals involved in IT development, IT operations, or IT service management and/or Individuals whose role are touched by DevOps and continuous delivery.

- **Prerequisites**

- Basic familiarity with Agile, Scrum, Lean, and ITSM principles is beneficial.
